LANE & KURTZ MINING COMPANY.—It is now some weeks since our readers were made aware that a mining company with the above name was in course of organization, and that it only remained for the Executive to grant a lease of the Meadows, on William Creek, on such terms as the company would feel justified in acceding to. We have much pleasure in announcing that the Executive has met these gentlemen in a liberal spirit, and that the lease was signed yesterday and that Messrs Lane and Kurtz leave this morning for San Francisco, in order to complete their financial arrangements, and return to the colony as early as possible with a view to commencing active operations. We have permission to indicate a few of the principal provisions of the lease, which are as follows: The lease is for a term of 21 years, with the privilege of 10 years' extension. The annual rental is \$250, payable in advance, and there is a bonus of \$125 paid on the application. The ground commences at Mesquite Creek (3 miles and 75 chains), with a varying width of three-fourths of a mile to a mile. The company engage on their part to erect within six months a sawmill, provided with a 50-inch circular saw, and of a nominal cutting capacity of six thousand feet per diem; to erect within eight months a pumping engine and hoisting works complete; to erect within eighteen months (within a radius of ten miles of Camerton) a quartz mill with ten stamps, none of which shall weigh less than 750 pounds. Such are the salient points of a lease respecting which we may take occasion to say more upon a future occasion. It is due to the Government to state that the gentlemen who have projected this great enterprise are much pleased with the spirit in which they have been met, a condition of things which, in their hands, may do the colony much good amongst capitalists in California and elsewhere.

THAT RAILWAY.—Withholding under the smartest public disclaimer, our feeble local contemporary denies having opposed the Canadian Pacific Railway, and defines "any one to find any such assertion or any such tendency in any article published in the Standard;" and in proof of his innocence the editor refers the public to something he wrote on 11th December, 1868. It is a matter of very little importance what he may have said or written twelve years ago; and we venture to think many things he wrote at that period would, if resuscitated now, place him in a not very enviable position before the public. If, as he claims, the railway formed an article in his political creed in 1868, he must indeed have sadly apostrophized since then, for it finds no place either in the terms of union which he introduced into the Legislative Council in April, 1868, or in the more elaborate programme submitted to the Yale Convention five months later. On both of these occasions the railway was wholly eliminated from his political creed, and from that time down to the present he has taken every opportunity of "throwing cold water" upon the great enterprise. If he has not opposed it in direct words, in the paper which he now publishes, he has offered a no less real opposition by misrepresenting, distorting and misquoting facts; and it is, indeed, a strange time for our contemporary to deny that he has offered the slightest opposition to a scheme to prove the impracticability of which his writings are being greedily quoted on the south of the forty-ninth parallel of latitude! We allude to this subject in sorrow—certainly in no spirit of jealousy. Did the slightest ground for jealousy exist, which there assuredly does not, this would be a most fitting occasion for its indulgence.

ROBBERY AND PRAISEWORTHY CONDUCT.—Yesterday morning whilst the propeller California, Capt Hays, was on the way down from Nanaimo to this port, a German family, steamer passengers, were robbed of a purse containing \$249 in gold which the Frau, while dressing, had left for a moment on the side of the berth. Word of the robbery was passed at once to the officers, and the captain, purser, mate and second mate searched the passengers and crew for the missing money. The search proved unsuccessful and it is believed the robbery was perpetrated by Chinese, of whom there were several in the steerage. After all hope of recovering the money had been abandoned, the officers learned that the family were left entirely destitute, whereupon a collection was taken up, Mr J C Holladay and the officers and crew subscribing \$90. Subsequently a passenger contributed \$20—thus swelling the amount to \$110—which sum was received with grateful acknowledgments by the family, who seem to be hardworking, respectable people. The noble generosity of the subscribers to the fund is beyond all praise.

THE STANDARD.—Our sickening contemporary is whistling to keep his courage up. Has anyone noticed how he has "let up" on the Government recently? The raw-headed-and-bloody-bones articles advocating revolt and another gravel-pit escapade, have entirely ceased. What's the matter? Has the "itching palm" been crossed—gossiped with Government Butcher? Rumor both it that the Standard is about changing editors, and that Mr Mr McMillan, late of the News, will succeed the late Mr Prodigy who was to "whip the Colonist out of its boots" but who has only succeeded in convincing his few friends that he "hasn't got the 'ops' (brains) to publish a decent paper or write a sensible article. In fact, our contemporary who, before he started, was looked upon as a sort of Literary Whale, has shrunk in public estimation to the proportions of a Minnow. Sic transit gloria Humbug!

The Steam Tiger was out for practice last evening under the management of her amateur engineers and worked satisfactorily.

THE NEWS from the farming districts of Kamloco and Okanagan is very encouraging. Last winter was unusually mild, there having been but six days rough weather in January and four in March; and throughout the whole winter there was never sufficient snow to cover the grass—consequently the cattle did splendidly and came out rolling in fat. To a person who has never before traveled in this section of country the number of cattle to be seen roaming over the prairie would be surprising, and they are increasing to such an extent that in a few years beef cattle and hides will be classed among our exports. Both the Spring and Summer of the year in these districts have been all that could be desired, copious showers of rain having fallen at short intervals during that time, thereby producing finer crops than have been known since the country began to be settled up.

SPIRITUALISM OR MODERN NECROMANCY.—Such is the title of a tract issued from the Press, being a sermon recently delivered by the very Reverend Edward Cridge, B. A., Dean of Christ Church, Victoria. As the title indicates, the sermon is directed against that system commonly called "Spiritualism," and the subject is handled in a thoughtful and able manner. The system is handled without gloves, yet without having recourse to any of those harshness of expression or plethora of adjectives too common in controversy. "To the law and the testimony," the necromancer and his works are brought; and we must confess that viewed in the ray of light shed upon them in the course of this little tract, they present a dark and forbidding aspect. To be had at the Book stores.

THE N. P. T. COMPANY'S propeller California, Capt Hays, returned from Nanaimo yesterday afternoon at 4 o'clock, and will sail at daylight this morning for Portland. She has on board 150 tons coal for the Gas Company and 130 tons for the N P T Company's steamers. The following names of intending passengers were booked last night: John Kuriz, C O Lane, John Adair, Mrs F F Victor, Joshua Davies, Wm Alexander, J C Holladay, Mrs L G Swadlow, Mrs C C Hayes, Wm Benning, wife and child, W Levy, M Fleen.

ON-SERIES.—The funeral of the late Mrs Bowden, wife of the Inspector of Police, took place yesterday and was very numerous. The deceased was a native of England, and was a member of both Lodges of the I O O F turning out in strong force. The remains were taken into St Andrew's Church, where the Rev Mr McGregor improved the sad occasion, after which the procession reformed and proceeded to the cemetery.

THE farmers of Saanich District are preparing for a show on the 26th September, and a Ploughing Match a day or two before. The results of last year's show in the District were very flattering, and there is scarcely a doubt that the forthcoming show will be even more successful. There ought to be a large attendance from the city.

THE Deluge steamer was employed yesterday in filling the large reservoir at the foot of Yates street with water drawn from the cistern at the corner of Yates and Government streets. During a part of the day the furnace was supplied with anthracite coal, which emitted very little smoke.

J.B. PRINTING.—Remember, that the Colonist is the only office in the colony that has the facilities for doing Job Printing expeditiously, well and low. All kinds of printing executed with neatness and dispatch.

THE NELSON CIRCUS.—The steamer Emma sailed for Port Townsend yesterday morning to bring over the Nelson Hippodrome and Circus. She is expected in to-day and the company will make their bow tonight.

A CHINAMAN summoned yesterday at the Police Court for failing to account for the washee of a customer, produced the articles and was discharged from custody.

USEFUL.—I M Gaud, of the Liverpool Exchange Buildings, has in hand a directory of all the newspapers published in the world. The undertaking is gigantic, but it properly done will prove useful.

BUSINESS MEN and others advertising in The Colonist will be sure of securing a medium for bringing their goods and callings to public notice that no other paper in the colony offers.

SALE OF THE LEVIATHAN.—Messrs Boscowitz have sold the steam-yacht Leviathan to U. Nelson & Co, of the Mainland. We learn that the new owners will place her in the coast fur-trade.

THE ship Headley, will sail for San Francisco from Nanaimo on Monday next. She will carry a large cargo of coal.

THE CORRAIR.—This iron bark is now out 170 days from London.

THISTLES.—This Bylaw is now in force. Read it.

'The Rickety shanty.'

EDITOR BRITISH COLONIST.—The "war article" of your contemporary is even more than ordinarily entertaining this morning, and that is saying much. Having, with one grand sweep of his magnificent pen changed the map of Europe, he alludes to Belgium as an "old rickety (ly) shanty," a "paltry nation," which must not be "allowed to stand in the way of the national development of France."

BUY IT AND TRY IT.—Russen's celebrated Coffee. The best on the Coast. Warranted a pure and healthful beverage.

Continued from second page.

Europe.
New York, July 25.—The Tribune's London special dated 1 o'clock, this morning, says English feeling was profoundly moved this morning in the terms of the proposed treaty between France and Prussia.

The grave queries with which Disraeli in the House thus far questioned the Government justly reflected general emotion. Conversation among members turned to no other topic.

Gladstone replied, while declining absolutely to commit the Government to any opinion or declaration whatever betrayed in his manner more than in his words as an unimpeachable apprehension that that document might prove authentic. His answer was given with a pale face and hesitatingly. When he sat down the House felt that England's relation with continental troubles had grown closer if not alarming.

To the mention of Belgium the House responded with an unwarmed thrill of sympathy—a clear recognition of England's obligation to protect her.

It is understood that immediate communications were made by Government to its agents at Berlin and Paris. Now the French Government will have instant opportunity to admit or deny the responsibility for the alleged treaty.

It is believed here that the genuine proposals are French, whilst its rejection is due to Prussia.

The copy of the Treaty to the Times is thought to have been supplied from Berlin. It is certain that the Times would not have published it unless it was authentic.

Paris, July 26.—French gunboats to operate on the Rhine and rivers of Prussia are being transported in sections overland from Marseilles.

The Journal Officielle this morning says: Marshal Loubet telegraphed late last night that the French had repelled the reconnoissance of the enemy near the town of Neiderdorf, 26 miles north-east of Strasburg. A [French] officer and two Prussians were killed. The Figaro says the officer killed was an Englishman.

London, July 26.—Several French cruisers are reported off Wick, Scotland, to-day. The news received by way of Berlin is very meagre, owing to the close watch kept upon the telegraph by the Prussian Government.

Frankfurt-on-the-Main has been designated as the Prussian headquarters.

There is great activity in all the English dockyards.

A writer to the Times thinks Napoleon will try to force his way into the old Kingdom of Hanover.

Copious showers last night greatly benefited the crops.

Nearly all the journals have editorial remarks this morning on the proposed treaty—all similar in tone. "France must explain this offensive treaty," are the words of the Times, and such is the burden of the London press. The Times particularly is seeking to make this a pretext for the intervention of England in favor of Prussia.

The attitude of Ireland is also commented upon. After giving details of many meeting resolutions of sympathy for France were adopted, the Times asserts that that sympathy is altogether due to Catholicism and consequent hatred of the German Protestants.

Brief dispatches just received report an insurrection in the Principality of Ava, resulting in the massacre of 400 persons. Further details are asked for.

Dover, July 26.—A French frigate passed this point yesterday afternoon, eastward bound.

London, July 26.—The Prince of Wales has gone to Denmark to influence that country to be strictly a neutral.

The Prussian authorities have granted permission to newspaper correspondents to follow the army.

The Prussians are concentrating a powerful force at Mayence.

The Prussians are using balloons for observations.

The Pall Mall Gazette says that now that the real designs of the French Emperor are revealed England should make every preparation for war.

The French forces at Osnabruck are estimated at 180,000.

The French report another cavalry skirmish near Metz claiming that the Prussians were beaten with the loss of three officers.

London, July 26.—A special to the Standard News to-day says the chief of the French army is concentrating at Strasburg and Belfort. They are Algerian forces consisting of Zouaves and Turcos. They reached Strasburg on the 24th and to-day took up position at Belfort close to Baden.

Sixteen companies Chasseurs de Africa arrived to-day via Lyons.

Dispatches from the Osnabruck, Stavola and Bistache rendezvous state that the army has commenced to move. Frontier and imperial guards had already started.

It is now thought certain that the Emperor designs closing in on the Prussians between Osnabruck and Wurttemberg, throwing his army on the German side of the Rhine. This army is composed of three corps.

was rejected by both parties. The Ambassador protested that France actually desired to maintain peace with Belgium, England and Holland.

Gladstone informed the House that advice from Berlin, settling the question of the authenticity of the Times' information regarding the alleged treaty, were hourly expected. The British Minister had telegraphed that the dispatch containing the original propositions of Napoleon embodied in the treaty, was executed in Bonaparte's handwriting.

Olway, Under Foreign Secretary, declined to make any communication or express any opinion on the proposal made by Napoleon to annex Holland.

Florence, July 26.—Minister Rannas has assured the House of Deputies that Italy will not yield to any pressure from France.

Copenhagen, July 26.—The Spanish Government has issued a proclamation of neutrality.

Madrid, July 26.—The danger of a Carlist rising is not yet over, and Government is redoubling its precautions.

Cuba.
Havana, July 25.—During a recent engagement in the Jurisdiction of Holguin and Puerto Principe, over 250 insurgents were killed.

Washington Territory.
SWINOMISH, July 28.—The construction party say they will open telegraphic communication with New Westminster, B C, in about 10 days.

Nevada.
VIRGINIA, July 26.—A slight shock of earthquake was felt here at 7:30 this evening.

Oregon.
SALEM, July 26.—In consequence of the presence of numerous roughs in the city the authorities decided increasing the police force to preserve order. The State Treasury has employed additional guards.

Montana.
CHRYSENE, July 26.—Information from South Pass says that the soldiers who were sent by the Government after the Big Horn expedition, overtook them but were unable to bring them back. The troops returned and the expedition proceeded to the Big Horn country.

California.
SAN FRANCISCO, July 26.—Scows for loading grain from the cars directly on board the vessels for foreign ports are being provided at the end of the wharf at Oakland, and will be ready within three weeks. The loading place will be somewhat nearer this city than Oakland.

The grain market in England appears to be as unsettled as in this city. Dispatches to dealers here differ widely as to price; some quote California wheat as low as 11s 6d, the market here is thoroughly demoralized. Buyers are not inclined to operate.

The Produce Exchange Board held a meeting to-day and discussed the question of a different location for their room, also as to changing the hour of meeting—but the propositions were voted down.

The annual regatta of the Yacht Club is set for Saturday. The list of competitors is made up.

Arrived—Schr Clara Light, Steamer Co. Sailed—Ship Coquimbo, Port Madison.

Household Furniture SALE

J. P. DAVIES & CO.
Have been instructed by Mr WILLIAM SON to sell by Auction at his residence,

KANE ST, NEAR DOUGLAS,
Saturday, August 6th

AT 11 O'CLOCK, A. M.

THE GRAND PROMOTERS OF HEALTH.
HOLLOWAY'S PILLS.

The grand secret of attaining happiness is to secure
 good health, without which life is stripped of its plea-
 sures. The first irregularity of any function should be
 corrected, and set right by appropriate doses of these
 good purifying Pills, which strengthen the system by
 thoroughly cleansing the blood from all impurities.
 They balance disordered action, remove the cause of dis-
 turbance and restore its normal and natural power. In
 every organ, without inconvenience, pain or any other
 drawback.

Derangement of the Bowels, Liver and Stomach
 Complaints.

This medicine is so well known in every part of the
 world, and the cures effected by its use are so wonderful
 as to astonish every one. Its pre-eminence as a remedy
 for bilious and liver complaints and derangements of
 the stomach and bowels, is no longer a matter of dispute
 or doubt. In these diseases the best medical advice is to
 take purifying Pills, which strengthen the system by
 thoroughly cleansing the blood from all impurities.
 They balance disordered action, remove the cause of dis-
 turbance and restore its normal and natural power. In
 every organ, without inconvenience, pain or any other
 drawback.

Derangement of the Bowels, Liver and Stomach
 Complaints.

THE FEMALE'S BEST FRIEND

For all debilitating disorders peculiar to the female, and
 every ailment peculiar to the life of women, youthful
 or aged, married or single, this medicine is the best
 remedy recommended with friendly assurances. It
 will correct all functional derangements to which they
 are subject.

Scorfula and all Skin Diseases.

For all skin diseases, however inveterate, these medi-
 cines are a sovereign remedy. While the Pills act upon
 the blood, which they purify, the ointment passes
 through the pores of the skin and cleanses every stric-
 ture as water under the nail, or as salt water under the
 most. The whole physico-mechanical system is rendered
 healthy, regular and vigorous.

Coughs, Colds and Asthma.

No medicine will cure colds of long duration or such
 as are settled upon the chest so quickly as these famous
 Pills. Even in cases where the first stage of asthma has
 appeared these Pills may be relied on as a certain and
 never failing remedy, particularly if the complaint be
 simultaneously rubbed into the chest and throat
 night and morning.

Indigestion—Bilious Headache.

These complaints may sometimes be considered trifling
 but it should be borne in mind that by inattention and
 neglect, they often and most seriously give rise to
 thought to a deranged stomach take Holloway's Pills, rub
 bisulphate of Ointment over the top of the stomach, and
 you will shortly perceive a change for the better in your
 digestion, spirits, appetite, strength and energy. The
 improvement, though it may be gradual will be thorough
 and lasting.

Holloway's Pills are the best remedy known
for the world for the following diseases:

Ayer's Cathartic Pills,
 For all the purposes of a Laxative
 Medicine.

Perhaps no one will
 admit that a universal
 remedy for every ailment
 is a cathartic, nor was
 ever before so universally
 adopted into use, in
 every country and among
 all classes, as this mild
 and efficient purgative
 Pills. The obvious rea-
 son is, that it is a more
 reliable and far more ef-
 fective remedy than any
 other. Those who have
 tried it, know that it cures them; those who have not,
 know that it cures their neighbors and friends, and
 all know that what it does for them it does for all.
 — That it never fails through any fault or neglect of
 its composition. — We have thousands upon thou-
 sands of certificates of their remarkable cures of the
 following complaints, but such cures are known in
 every neighborhood, and we need not publish them.
 Adapted to all ages and conditions in all climates;
 containing neither calomel nor any deleterious drug,
 they may be taken with safety by children. Their
 sugar coating preserves them ever fresh and makes
 them pleasant to take, while being purely vegetable
 no harm can arise from their use in any quantity.
 They operate by their powerful influence on the
 internal viscera to purify the blood and stimulate it
 to healthy action — remove the obstructions of the
 stomach, bowels, liver, and other organs of the
 body, restoring them to their normal action, and by
 correcting, wherever they exist, such derange-
 ments as are the first origin of disease.

Minute directions are given in the wrapper on
 the box for the following complaints, which these
 Pills easily cure.

For Bilepsia or Indigestion, Flatulency,
 loss, Languor and Loss of Appetite, they
 should be taken morning and evening, with the stomach
 and restore its healthy tone and action.

For Liver Complaint and its various sym-
 ptoms, Bilious Headache, Nausea, Stomach
 Complaints, Green Stools, &c., they should be
 taken in the morning, with the stomach empty, and
 in the evening, with the stomach full, to cor-
 rect the derangement, and remove the obstructions which cause it.

For Dysentery, Stricture, Hemorrhoids, but one mild
 dose is generally required.

For Rheumatism, Gout, Gravel, Pains
 of the Heart, Pain in the Side,
 Back and Loins, they should be continuously
 taken, as required, to change the diseased action of
 the system. With such change these complaints
 disappear.

For Dropsy and Dropsical Swellings they
 should be taken in large and frequent doses to
 produce the effect of a drastic purge.

For Suppression a large dose should be taken
 as it produces the effect of a diuretic.

As a Diuretic Pills take one or two Pills to pro-
 mote digestion and relieve the stomach.

An occasional dose stimulates the stomach and
 bowels into healthy action, restores the appetite,
 and invigorates the system. Hence it is often
 vant among men no serious derangement exists,
 one who feels tolerably well, often finds that a dose
 of these Pills makes him feel decidedly better, from
 their cleansing and renovating effect on the digestive
 apparatus.

Ayer's Cathartic Pills,
 For all the purposes of a Laxative
 Medicine.

Perhaps no one will
 admit that a universal
 remedy for every ailment
 is a cathartic, nor was
 ever before so universally
 adopted into use, in
 every country and among
 all classes, as this mild
 and efficient purgative
 Pills. The obvious rea-
 son is, that it is a more
 reliable and far more ef-
 fective remedy than any
 other. Those who have
 tried it, know that it cures them; those who have not,
 know that it cures their neighbors and friends, and
 all know that what it does for them it does for all.
 — That it never fails through any fault or neglect of
 its composition. — We have thousands upon thou-
 sands of certificates of their remarkable cures of the
 following complaints, but such cures are known in
 every neighborhood, and we need not publish them.
 Adapted to all ages and conditions in all climates;
 containing neither calomel nor any deleterious drug,
 they may be taken with safety by children. Their
 sugar coating preserves them ever fresh and makes
 them pleasant to take, while being purely vegetable
 no harm can arise from their use in any quantity.
 They operate by their powerful influence on the
 internal viscera to purify the blood and stimulate it
 to healthy action — remove the obstructions of the
 stomach, bowels, liver, and other organs of the
 body, restoring them to their normal action, and by
 correcting, wherever they exist, such derange-
 ments as are the first origin of disease.

DOCTOR LERAS'
 (Doctor of Medicine.)

SOLUBLE PHOSPHATE OF IRON.

Clear as spring water and tasteless: has the advan-
 tage over all ferruginous preparations of containing iron
 and Phosphorus, which are the elements of the blood.
 It cures chlorosis, anæmia, indigestion, difficult diges-
 tion, dyspepsia, anæmia, general debility and poor-
 ness of the blood, and agrees especially with the most
 delicate stomachs.

Miscellaneous.
French Medicines.
GRIMAULT & CO.

PREPARED BY
 Chemists to H. I. H. Prince Napoleon

PARIS.

These different medicines represent the most recent
 medical discoveries, founded on the principles of Chemis-
 try and therapeutics. They must not be confused with
 secret or quack medicines, as their names sufficiently
 indicate their composition; a circumstance which has
 caused them to be appreciated and prescribed by the
 faculty in the whole world. They widely differ from
 those numerous medicines advertised in the public paper
 as able to cure every possible disease, as they are ap-
 plicable only to a very few complaints. The most
 stringent laws exist in France, with regard to the sale of
 medical preparations, and only those which have un-
 dergone an examination by the Academy of Medicine, or
 have been proved efficacious, either in the Hospitals, or
 in the practice of the first medical men, are authorised by
 the Government. This fact must be a guarantee for the
 excellency of Messrs. GRIMAULT & Co's medicines.

Women's and Children's Diseases.
Grimault's Syrup of Iodized
Horse Radish.

Patronized for more than twenty years by the Paris
 Physicians. Cures lymphatism, rachitism, scrofula,
 congestion of the glands of the neck, paleness and flac-
 cidities of the flesh, loss of appetite, weakness of con-
 stitution, the various eruptions on the face, boils, pimples,
 itchings, — it is the best remedy against the first stage
 of scrofula, and is the most powerful depurative
 known.
